UV & MOISTURE RESISTANT

STAINLESS STEEL HIDDEN FIXINGS

BRIGHTER PIGMENTS

ENGINEERED TO WITHSTAND AUSTRALIAN ENVIRONMENT

EASY TO INSTALL

RESISTANT TO HUMIDITY

Tufright Composite Cladding has the same benefits as our Composite Decking. It is made from bamboo/wood fibres, recycled HDPE plastic and reinforced plastics, UV additives, environmentally friendly bonding agents, and colouring agents.

Composite Cladding is the Ultimate Cladding Solution and is superior in every way to traditional timber cladding in many ways due to the fact that it has a very long lifespan – it is durable without the need for oiling, painting, and sealing. It is also low maintenance, splinter-free, resistant to termites, moisture-resistant due to its plastic content, and Fire Rated. Tufright Cladding is also more environmentally friendly and sustainable as bamboo grows significantly faster than hardwood timbers, reducing the risk of deforestation and using hardwood sawdust and recycled plastics means less material goes to waste.

Tufright's Composite Cladding is available in 156mm x 21mm x 5400mm and comes in a range of colours and finishes, giving you the ability to create residential and commercial projects that are both stylish and functional. Tufright is versatile, easy to install, and looks fantastic in any setting.

Whatever you use our cladding for, it will definitely provide safe, long-wearing and eco-friendly sophistication.
